International Selfie Day is on a way

Selfie Day.

Time to level up!!

Time to celebrate it on an international level as well.

As you know, 21st of June (starting from 2014) is observed as National Selfie Day [www.NationalSelfieDay.net]

So from now (starting 2019) the next day brings to the world International Selfie Day [www.InternationalSelfieDay.net]

And does so annually. On 22nd of June.

Two days in a row?

Well, it's never too much to celebrate. (Especially while having an International observation day dedicated to selfies.)

The day is founded by SelfieElate.com: the project specialised for so-called selfie generation. With its *freemium* (*free & premium*) mobile app for its *glocal* (*global & local*) use the team strives to bring into the world special space and perfect place for selfie enthusiasts, fans, brands, and influencers.

Because it is never too late to elate with a selfie.
